1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 5 and 9 are, drawn to a 0.75-power computing **wherein a multiplication between an infinity and zero which leads its operation result to an indefinite value is inhibited**, classified in class 708, subclass 525.
- II. Claims 2-4, 6-8 and 10-12 are, drawn to a 0.75-power computing for **providing a desired result**, classified in class 708, subclass 606.

2. The inventions are distinct, each from the other because:

Each group of claims is directed to a separate invention. It is noted that the groups maybe belong to a system.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
